

SURE-FIT MANUFACTURING LTD.

ALTERATION MEASURING CHART

Instructions

Customer should be measured:

- Over a bathing suit or skintight clothing.
- By another person.
- Standing straight and looking forward.
- Using a soft cloth measuring tape pulled snug but not tight.

To assist in the accuracy:

- Place a pen or chalk mark at the location where the Circumference Measurements are taken.
- For upper body Lengths, measure from the Shoulder Bone to the center of the body.
- For Leg Lengths have customer stand with a 1” thick binder between their legs at comfortable crotch height.
